The global Water-based Packaging Primers market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

In the digital printing of corrugated box, folding box, flexible packaging and other packaging - primer is a necessary link. The primer can improve the ink adhesion and dryness of the substrate surface, thus improving the final product quality and production efficiency. From the perspective of packaging manufacturing, the primer can improve the dryness of the water-based system and improve the wear resistance, so as to print and stack more packages on the production line and maximize productivity. Water-based coatings refer to coatings that use water as solvent or dispersion medium.
