Abstracts

Water-based resins are the prime constituents of Latex-based paints or any water reducible coatings or paints because they completely dissolve in water and other solvents.

Water-based resins are generally found in coatings that are easily soluble in water, such as water-borne coatings, water reducible coatings or Latex-based paints. These coatings consist of well-known Latex products and the synthetic polymer based products. When mixed in water, these resins generally form dispersions of micelles rather than true solutions. The particles range in size from 0.01 to 0.1 micrometer, and produce a clear mixture in the absence of added pigment.

SCOPE OF THE REPORT:

This report focuses on the Water-based Resin in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
