Water-based shop primer is an environmentally friendly paint that uses water as a solvent and is widely used in floor and wall coatings in industrial workshops, warehouses, laboratories and other places. It is mainly composed of water, resin, pigment, additives, etc. Compared with traditional solvent-based coatings, waterborne shop primer does not contain harmful solvents and has the characteristics of low VOC (volatile organic compound) emissions, so the risk of environmental pollution and human health is lower. Due to its environmental protection, water-based shop primers are widely used in many industrial fields, especially in modern manufacturing, electronics industry, food processing, medical and laboratory environments that require high hygiene and low pollution.
