Abstracts

The global Water-based Waterproof Coating for Corrugated Paper market size is expected to reach \$ 469 million by 2032, rising at a market growth of 6.3% CAGR during the forecast period (2026-2032).

Global production of Water-based Waterproof Coating for Corrugated Paper reached 148,800 tons by 2025, with an average price of US\$2,000 per ton. Water-based waterproof coatings for corrugated paper are environmentally friendly polymer formulations designed to enhance the water resistance of cardboard and corrugated packaging. Unlike solvent-based coatings, these coatings use water as the primary carrier, reducing VOC emissions and improving safety during application. They form a thin, uniform protective layer on the paper surface that prevents moisture penetration while maintaining the flexibility, printability, and recyclability of the corrugated material, making them suitable for food packaging, e-commerce boxes, and other moisture-sensitive applications .
