The global Water-based Waterproof Coating market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Water-based waterproof coating is a type of coating that is applied to surfaces to provide protection against water damage. It is formulated with water as the primary solvent, making it environmentally friendly and easy to clean up. This type of coating forms a seamless and flexible barrier that prevents water from penetrating the surface while allowing moisture vapor to escape. Water-based waterproof coatings are commonly used on roofs, walls, decks, and other surfaces exposed to water or moisture. They are typically used in construction, building maintenance, and other industries where water damage prevention is essential.
