The global Water Curtain Nozzle market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

A water curtain nozzle is a type of nozzle that creates a continuous curtain of water droplets. It is typically used in fire protection systems to create a barrier or screen of water to prevent the spread of fire, smoke, or hazardous materials. Water curtain nozzles can be installed horizontally or vertically, and they create a dense wall of water that acts as a separation between different areas, preventing fire or smoke from moving across.
