Abstracts

Water-soluble anti-rust paint is an anti-rust paint that uses water as a diluent or solvent. This coating uses no volatile organic compounds (VOCs) during production and application, making it environmentally friendly and safe. Water-soluble anti-rust coatings usually contain water-based resins, anti-rust pigments, additives and other ingredients, which can effectively prevent metal surface oxidation, corrosion and rust. This kind of coating can be diluted and cleaned directly with water during construction, reducing the harm of organic solvents to the environment and human body. Water-soluble anti-rust coatings are widely used in metal structures, equipment, pipelines and other fields, and have good anti-corrosion effects and sustainability.
