Abstracts

The global Water Toxicity Detector market size is expected to reach \$ 317.8 million by 2030, rising at a market growth of 3.7% CAGR during the forecast period (2024-2030).

The domestic market for testing and measuring equipment will be approximately RMB 20 billion in 2022, and the global testing and measuring equipment market will maintain rapid growth.

The water quality biological toxicity detector measures the acute biological toxicity caused by heavy metals and other organic pollutants in the tested environmental samples by measuring the change of luminosity of luminescent bacteria. Compared with traditional fish, fleas and other aquatic organisms as biological detection methods, the luminescent bacteria method is simple, fast, sensitive, adaptable, repeatable, high-precision, low-cost, and widely used. The biological toxicity of substances can be measured.

This report studies the global Water Toxicity Detector production, demand, key manufacturers, and key regions.
