## Abstracts

The global Water Treatment Chemicals market size is expected to reach \$ 47620 million by 2029, rising at a market growth of 3.6% CAGR during the forecast period (2023-2029).

Global 5 largest manufacturers of Water Treatment Chemicals are Solenis, SNF Group, Ecolab, Veolia and Kemira, which make up about 30%. Among them, Solenis is the leader with about 10% market share.

Asia-Pacific is the largest market, with a share about 37%, followed by Europe and North America, with share about 30% and 22%. In terms of product type, Flocculants & Coagulants occupy the largest share of the total market, about 25%. And in terms of product application, the largest application is Municipal Water Treatment, followed by Papermaking Waste Water Treatment.

Water treatment technologies are organized into three general areas: physical methods, chemical methods, and energy intensive methods. Chemical methods of treatment rely upon the chemical interactions of the contaminants we wish to remove from water, and the application of chemicals that either aid in the separation of contaminants from water, or assist in the destruction or neutralization of harmful effects associated with contaminants. Chemical treatment methods are applied both as stand-alone technologies and as an integral part of the treatment process with physical methods. In this report, we mainly research water and wastewater treatment chemicals including Ph adjusters & softeners, flocculants & coagulants, corrosion inhibitors, Scale Inhibitors/Dispersants, biocides & disinfectants and others.

This report studies the global Water Treatment Chemicals demand, key companies, and
