According to our (Global Info Research) latest study, the global Wall Sealer market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Wall Sealer is a coating or primer used to prepare wall surfaces for subsequent application of other coatings, such as paint or wallpaper. Its main function is to fill in small holes, depressions and unevenness in the wall, providing an even surface so that paint adheres better and the color is even.

Wall Sealer generally has good adhesion and sealing properties, which can reduce paint penetration and avoid paint absorption, thus saving paint usage and achieving better coverage. In addition, wall sealing primer improves the moisture and moisture resistance of the wall, helping to protect it from moisture and dirt. This product is commonly used in interior and exterior painting projects to improve the appearance and durability of paint.
