## Abstracts

The global Waterjet Cutting Machinery market size is expected to reach \$ 1336 million by 2032, rising at a market growth of 3.7% CAGR during the forecast period (2026-2032).

This report studies the Waterjet Cutting Machinery market, Waterjet machines provide an efficient method of producing intricate components of machines with relative ease and precision. It facilitates versatile and effective machining, cutting, and shaping of metals and other materials. A waterjet machine uses a pump to eject water at an extremely high pressure through a nozzle to cut metals and other materials. These machines generate a lesser amount of heat compared to other cutting technologies and can, therefore, be used even on materials that are highly sensitive to high temperatures. Waterjet machines also help to ensure minimal wastage of the material being machined.

North America's revenue accounted for the highest market share (30%), followed by Europe.

The global waterjet cutting machines industry markets mainly concentrate in Europe, North America, Japan and China. And the market is supplied by a combination of large multinational firms and smaller local companies. The leading global firms include Flow International, Omax, Bystronic Group, Sugino Machine and ESAB Cutting Systems, etc, with about 70% market shares.
