Abstracts

Waterjet machines provide an efficient method of producing intricate components of machines with relative ease and precision. It facilitates versatile and effective machining, cutting, and shaping of metals and other materials. A waterjet machine uses a pump to eject water at an extremely high pressure through a nozzle to cut metals and other materials. These machines generate a lesser amount of heat compared to other cutting technologies and can, therefore, be used even on materials that are highly sensitive to high temperatures. Waterjet machines also help to ensure minimal wastage of the material being machined.

SCOPE OF THE REPORT:

The global waterjet cutting machines industry markets mainly concentrate in Europe, North America, Japan and China. And the market is supplied by a combination of large multinational firms and smaller local companies. The leading global firms include Flow International, Omax, Bystronic Group, Sugino Machine, ESAB Cutting Systems and others. These companies tend to compete against each other globally to supply most of the largest waterjet cutting machines markets. In many markets, these leading global firms also face competition from local players.

The global market of waterjet cutting machines has mainly been driven by its downstream industry, the strong growth of the automotive, stone & tiles, job shop, aerospace & defense and other industrial field in the last decade. Economic investment and national policies are also the main growth catalysts for the market.

Despite the presence of competition and brand effect problems, due to the awareness of end-users and their demand for high end products, investors are still optimistic about this area. There will be more new investors entering into this industry in the future. The

manufacturers who want to occupy the market must depend on market mechanism reform, core technology improvement, manufacturing equipment innovation, and brand establishment.

The worldwide market for Waterjet Cutting Machinery (Waterjet Cutting Machines) is expected to grow at a CAGR of roughly 2.6% over the next five years, will reach 1060 million US\$ in 2024, from 910 million US\$ in 2019, according to a new GIR (Global Info Research) study.

This report focuses on the Waterjet Cutting Machinery (Waterjet Cutting Machines) in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.
