## Abstracts

According to our (Global Info Research) latest study, the global Waterjet Cutting Machines market size was valued at USD 932.2 million in 2023 and is forecast to a readjusted size of USD 1197.1 million by 2030 with a CAGR of 3.6% during review period.

Waterjet machines provide an efficient method of producing intricate components of machines with relative ease and precision. It facilitates versatile and effective machining, cutting, and shaping of metals and other materials. A waterjet machine uses a pump to eject water at an extremely high pressure through a nozzle to cut metals and other materials. These machines generate a lesser amount of heat compared to other cutting technologies and can, therefore, be used even on materials that are highly sensitive to high temperatures. Waterjet machines also help to ensure minimal wastage of the material being machined.

Global Waterjet Cutting Machines main players include Flow International, Omax, KMT AB, Sugino Machine, Bystronic Group, etc., totally accounting for about 75% of market. North America is the largest market, with a share over 30%.
