Abstracts

The global Waterjet Machine market size is expected to reach \$ 1534 million by 2032, rising at a market growth of 5.0% CAGR during the forecast period (2026-2032).

Waterjet machines provide an efficient method of producing intricate components of machines with relative ease and precision. It facilitates versatile and effective machining, cutting, and shaping of metals and other materials. A waterjet machine uses a pump to eject water at an extremely high pressure through a nozzle to cut metals and other materials. These machines generate a lesser amount of heat compared to other cutting technologies and can, therefore, be used even on materials that are highly sensitive to high temperatures. Waterjet machines also help ensure minimal wastage of the material being machined.

USA is the largest Waterjet Machine market with about 36% market share. Europe is follower, accounting for about 22% market share.

The key players are Omax, Bystronic, KMT, Water Jet Sweden, ESAB, Flow, Resato, Waterjet Corporation, Huffman, Dardi, Yongda Dynamo Electirc, Shenyang APW, Sino Achieve, Shenyang Head etc. Top 3 companies occupied about 63% market share.
