According to our (Global Info Research) latest study, the global Waterless Printing Plate market size was valued at US$ million in 2025 and is forecast to a readjusted size of US$ million by 2032 with a CAGR of %during review period.

Waterless printing plate is a printing plate material used in waterless offset printing technology. Unlike traditional offset printing process, waterless printing technology does not use fountain solution, but relies on the oleophilic and oleophobic properties of different areas on the printing plate surface to achieve image transfer. This technology can provide higher print quality, shorter preparation time and more environmentally friendly operation by reducing the use of water in the printing process.
