Abstracts

Waterproof tape is a kind of lifetime non-curing self-adhesive waterproof sealing tape made of butyl rubber as the main raw material and other additives. It has strong adhesion to various materials. At the same time, it has excellent weather resistance, aging resistance and water repellency, and functions as sealing, shock absorption and protection on the surface of the adherend.

SCOPE OF THE REPORT:

This report focuses on the Waterproof Adhesive Tape in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application. The product is completely solvent-free, so it does not shrink and does not emit toxic gases. Because it does not cure for life, it has excellent follow-up to thermal expansion and contraction and mechanical deformation of the surface of the adherend. It is an extremely advanced waterproof sealing material.

The worldwide market for Waterproof Adhesive Tape is expected to grow at a CAGR of roughly 4.9% over the next five years, will reach 760 million US\$ in 2023, from 570 million US\$ in 2017, according to a new GIR (Global Info Research) study.
