According to our (Global Info Research) latest study, the global Waterproof Nano Coating market size was valued at US\$ 143 million in 2024 and is forecast to a readjusted size of USD 233 million by 2031 with a CAGR of 7.3% during review period.

Nanometer waterproof coating is a kind of fluorine compound solution with waterproof and oil proof properties, using fluorine containing solvent as solvent, which can form ultra-thin waterproof coating. In the nanoscale, the low convex surface can adsorb the surrounding gas molecules to form a stable gas coating, avoiding the direct contact between the material and water molecules.
