Abstracts

The global Waterproofing Membrane market size is expected to reach \$ 652 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Waterproofing is the combination of materials used to prevent water intrusion into the structural elements of a building or its finished spaces. Its main purpose is to resist hydrostatic pressure exerted by moisture in the liquid state. Waterproofing membranes are provided in the form of coil. And the most important step in the manufacturing process is impregnating asphalt waterproof materials or polymer water-proof materials onto the carcass. The materials are used in a system to prevent the ingress of water into foundations, roofs, walls, basements, buildings, and structures when properly installed.

Global key players of Waterproofing Membrane are Henkel Polybit, Awazel, Dermabit Waterproofing Industries, SOPREMA, etc. The top 3 companies occupied about 30% market share. In terms of product type, Bitumen is the largest segment, accounting for about 69% of the market share, while in terms of downstream, commercial is the largest downstream segment, accounting for about 39% of the market share.

This report studies the global Waterproofing Membrane production, demand, key manufacturers, and key regions.
