According to our (Global Info Research) latest study, the global Waterstop market size was valued at US\$ 2764 million in 2024 and is forecast to a readjusted size of USD 3870 million by 2031 with a CAGR of 5.0% during review period.

This report studies the Waterstop market, A waterstop is an element of a concrete structure, intended to prevent the passages of fluids (such as water) when embedded in and running continuously through concrete joints. Waterstops are grouped in two distinct categories. Waterstops for joints without any movement of the adjoint concrete sections (construction cold joints) and waterstops for joints with movement of the adjoint concrete sections (dilation joints). Waterstop plays an important role in waterproofing a concrete structure, especially joints, the weakest part which is liable to leakage of water or chemical liquids. So waterstops are designed as a fluid-tight diaphragm embedded in or running along the joints to solve these problems.

Global Waterstop key players include Sika, Trelleborg, GCP Applied Technologies Inc., Jp Specialties, etc. Global top four manufacturers hold a share about 6%.

Europe is the largest market, with a share over 25%, followed by North America and China, both have a share over 35 percent.

In terms of product, PVC Waterstop is the largest segment, with a share about 37%. And in terms of application, the largest application is Public Utilities, followed by Industrial Construction, Residential & Commercial Construction.
