Wave and Surf Pools are specialized swimming pools designed to create artificially generated waves, allowing people to experience surfing or bodyboarding in a controlled environment. These pools are popular attractions in water parks, surf parks, resorts, and leisure facilities.

Wave and surf pools use various mechanisms to generate waves within the pool. These mechanisms can include paddles, air chambers, or other wave-producing equipment. These pools can create a range of wave types, from gentle ripples for leisurely swimming to more powerful, surfable waves for experienced surfers. Some wave and surf pools are designed as surf simulators, providing a continuous flow of surfable waves. These simulators are often used for surf training and recreation.

Wave and surf pools provide a unique opportunity for people to experience the thrill of riding waves, regardless of their proximity to natural surf spots. They are often part of larger water park attractions and leisure facilities, enhancing the overall experience for visitors.
