## Abstracts

According to our (Global Info Research) latest study, the global We Media Outsourcing Video Editing market size was valued at US\$ 2832 million in 2025 and is forecast to a readjusted size of US\$ 5448 million by 2032 with a CAGR of 9.8% during review period.

Outsourced video editing for we media refers to a service model in which content creation tasks?such as video cutting, voiceovers, subtitling, special effects, and thumbnail design?are delegated to professional third parties or freelancers. This approach is widely adopted by content creators, including short-video bloggers, brand accounts, and institutional accounts. By outsourcing, clients can save time and labor costs, obtain professional-grade video products, and enhance content quality and reach; it is a common content production solution in current self-media operations.

Driven by the rapid growth of global short-video platforms, live-streaming services, and the creator economy, the demand for outsourced video editing services within the self-media sector continues to rise. Platforms such as YouTube, TikTok, Instagram, Facebook, Bilibili, Douyin, and Kuaishou are constantly elevating video content consumption, compelling individual creators, MCNs, brand-owned channels, and SMEs to increase their content update frequency. This has led to a significant surge in demand for professional services?including video editing, subtitling, thumbnail design, audio optimization, motion graphics, multi-platform versioning, and AI-powered editing. Simultaneously, the rapid expansion of corporate digital marketing and live-streaming e-commerce has prompted brands to place greater emphasis on the production efficiency and reach of high-quality video content; consequently, more creators are opting to outsource post-production to reduce costs, shorten turnaround times, and maintain consistent publishing schedules. Furthermore, the maturation of technologies such as

AI-driven editing, intelligent subtitle generation, cloud-based collaborative editing, digital asset management, and multilingual localization has further enhanced production efficiency and service quality, propelling the outsourced video editing industry toward greater professionalization, intelligence, subscription-based models, and globalization.
