Abstracts

Excellent high strength and increased corrosion resistance cycles throughout its useful life make it ideal for bridge construction. Similarly, the extraordinary charm of weathering steel has led to the increasing use of this material in buildings and by designers outdoors. Sheets are the main and most widely used form of weathering steel. Weathering steel not only provides high strength to buildings and structures, but also increases their aesthetic appeal. Weathered panels are also used in high temperature and sulfur-rich environments to extend the life of metals.
