According to our (Global Info Research) latest study, the global Weighting Agents market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Weighting agents are the additives which are added to the drilling fluids to increase the fluid density. As a result, the formation pressure is controlled, the formation caving is inhibited and the pulling of dry pipe is eased. Weighting agents are finely powdered solid. The use of weighting agent is to overbalance the fluid pressure during drilling operation which helps in preventing the fluid from exerting the hydrostatic pressure on the exposed oil and gas reserves.
