According to our (Global Info Research) latest study, the global Weld Fasteners market size was valued at US\$ 4116 million in 2025 and is forecast to a readjusted size of US\$ 5753 million by 2032 with a CAGR of 4.9% during review period.

Weld fasteners are mechanical fastening components that are permanently attached to a base material through welding processes such as arc stud welding, capacitor discharge welding, or short-cycle welding. They provide threaded, locating, or structural attachment points without requiring access to the backside of the workpiece. Weld fasteners are widely used in automotive manufacturing, steel structures, rail systems, and sheet metal fabrication due to their high efficiency, strength, and suitability for automated production. In 2025, global Weld fasteners production reached approximately 400000 tons,

average price was \$1,000 / ton, gross margin 30%
