The global Weld Studs market size is expected to reach \$ 8578 million by 2032, rising at a market growth of 4.4% CAGR during the forecast period (2026-2032).

Stud welding is a technique similar to flash welding where a fastener or specially formed nut is welded onto another metal part, typically a base metal or substrate. The fastener can take different forms, but typically fall under threaded, unthreaded or tapped. The bolts may be automatically fed into the spot welder. Weld nuts generally have a flange with small nubs that melt to form the weld.

US was the largest consumer market with a market share of about 25%. Europe and China ranked the second and third markets with the market share of about 23% and 16%.

Weld Studs are widely used Automotive, Machinery & Equipment, Airplane, Structural applications etc. As the demand increases rapidly with higher spending propensity and a rising demand for automation in developing regions.

Nowadays, the top three companies make up over 6% market share of the Weld Studs market, and the world's large enterprises are mainly concentrated in US and Europe. The top three manufacturers are Nelson, STANLEY, HBS.
