The global Welding Wires & Welding Electrode market size is expected to reach \$ 26720 million by 2032, rising at a market growth of 2.3% CAGR during the forecast period (2026-2032).

Welding is a fabrication or sculptural process that joins materials, usually metals by causing fusion, which do not melt the base metal. a filler material is typically added to the joint to form a pool of molten material (the weld pool) that cools to form a joint that is usually stronger than the base material. Pressure may also be used in conjunction with heat, or by itself, to produce a weld. Welding also requires a form of shield to protect the filler metals or melted metals from being contaminated or oxidized. Welding Wires & Welding Electrode is the basic consumable material

Global Welding Wires & Welding Electrode key players include Gloden Bridge, Tianjin Bridge, Weld Atlantic, Shandong Solid Solider, Shandong Juli Welding etc. Global top five manufacturers hold a share over 25%.
