Wet Chemical Type Fire Extinguisher is a fire extinguisher designed for kitchen fires and other oil fires. It uses a water-based chemical solution (usually a potassium salt solution) to effectively extinguish fires caused by grease, cooking oils and fats through a spray. Wet chemical fire extinguishers not only quickly cool the fire source, but also form a layer of foam to prevent the flame from reigniting. Due to its excellent fire extinguishing effect and special ability to deal with oil fires, wet chemical fire extinguishers are widely used in kitchens and cooking places, especially in restaurants, hotels, kitchens and canteens.
