According to our (Global Info Research) latest study, the global Wetsuits market size was valued at USD 3482 million in 2023 and is forecast to a readjusted size of USD 4677.4 million by 2030 with a CAGR of 4.3% during review period.

A wetsuit is a special garment, usually made of foamed neoprene, which is worn by surfers, divers, windsurfers, canoeists, and others engaged in water sports, providing thermal insulation, abrasion resistance and buoyancy.

Wetsuits are used for thermal insulation for activities where the user is likely to be immersed in water, or frequently doused with heavy spray, often approaching from near-horizontal directions, where normal wet-weather clothing is unlikely to keep the water out.

The insulation properties depend on bubbles of gas enclosed within the material, which reduce its ability to conduct heat. The bubbles also give the wetsuit a low density, providing buoyancy in water.

Global Wetsuits key players include O'Neill, Quiksilver, Billabong, Rip Curl, Body Glove, etc. Global top five manufacturers hold a share over 65%.
