The global White Cement market size is expected to reach \$ 1203 million by 2032, rising at a market growth of -3.5% CAGR during the forecast period (2026-2032).

White cement is a powdery material which hardens when mixed with water. It serves as binder for natural and artificially processed aggregates, such as sand and gravel, for production of mortar, plaster and concrete. White cement has essentially the same properties as grey cement, except for color. The whiteness of the cement depends on the raw materials and the manufacturing process. It is the metal oxides primarily iron and manganese that influence the whiteness and undertone of cement. In order to get the color of the white cement, its method of production is different from that of the ordinary cement. However, this modification in its production method makes White Cement far more expensive than the ordinary cement. There are white portland cement, white masonry cement, white portland limestone cement and other product types, in this report, it covers all kinds of white cement.

The consumers concentrated in USA, Europe, Middle East and APAC. As the largest consumption market in the world, APAC takes 27% of global market share. Cementir Holding, JKCL, Cimsa, Cemex, Lafarge, Sotacib and Ras Al-Khaimah are the global leading manufacturers of white cement. The key participant in the white cement market is Cementir Holding which accounts for about 9% of production market.
