According to our (Global Info Research) latest study, the global Whole Slide Imaging in Pathology market size was valued at USD 324.1 million in 2022 and is forecast to a readjusted size of USD 645.2 million by 2029 with a CAGR of 10.3% during review period.

The adoption of digital pathology, including whole slide imaging, has been on the rise. Pathology laboratories and healthcare institutions are increasingly transitioning from traditional glass slide-based workflows to digital platforms. This shift aims to enhance collaboration, streamline workflows, and improve diagnostic accuracy.

WSI facilitates telepathology, allowing pathologists to view and analyze digital slides remotely. This trend has become especially relevant in situations where access to pathology expertise is limited. Telepathology supports remote consultations, second opinions, and collaborative discussions among pathologists.
