## Abstracts

The global Whole Slide Imaging in Pathology market size is expected to reach \$ 645.2 million by 2029, rising at a market growth of 10.3% CAGR during the forecast period (2023-2029).

The adoption of digital pathology, including whole slide imaging, has been on the rise. Pathology laboratories and healthcare institutions are increasingly transitioning from traditional glass slide-based workflows to digital platforms. This shift aims to enhance collaboration, streamline workflows, and improve diagnostic accuracy.

WSI facilitates telepathology, allowing pathologists to view and analyze digital slides remotely. This trend has become especially relevant in situations where access to pathology expertise is limited. Telepathology supports remote consultations, second opinions, and collaborative discussions among pathologists.
