Wildlife exclusion fence is a fencing system used to prevent wildlife from entering specific areas or facilities. This fence is typically made of high-strength, corrosion-resistant materials, possessing good durability and stability. The design of the fence takes into account the habits and behavioral characteristics of wildlife, effectively preventing wildlife from crossing or climbing through reasonable mesh sizes, heights, and shapes. Wildlife exclusion fence is widely used in farmland, orchards, livestock farms, airports, highways, and other places to protect crops, livestock, aviation safety, and traffic safety. In the Chinese context, wildlife exclusion fence is one of the important measures to protect human production activities and ecological environments from wildlife intrusion.
