According to our (Global Info Research) latest study, the global Wind Power Coating market size was valued at USD 384.1 million in 2023 and is forecast to a readjusted size of USD 496.4 million by 2030 with a CAGR of 3.7% during review period.

The erosion and corrosion of wind towers and blades is not a surprise given the variety of and often harsh environmental conditions encountered at sea and on land. If not protected, this erosion and corrosion will reduce the structure's strength, reliability, life span and, ultimately, its economic value. So coating plays an important role in protecting blades, tower and other components from environment.

Global core wind power paint manufacturers include Hempel, AkzoNobel and PPG etc. The top 3 companies hold a share about 61%. Asia is the largest sales market, with a sales market share in value about 55%, followed by Europe with the share about 21%.

In terms of product, polyurethane coating is the largest segment with a sales market share in value about 57%. And in terms of application, the largest application is onshore towers with a sales market share in value about 50%.
