According to our (Global Info Research) latest study, the global Wind Turbine Installation Vessel market size was valued at US\$ 22.6 million in 2024 and is forecast to a readjusted size of USD 54.7 million by 2031 with a CAGR of 13.6% during review period.

Self-propelled jack-up vessel is a vessel specifically designed for the installation of offshore wind turbines. Similar to a jack-up rig it is self-elevating. To enable quick relocation in the wind farm it is self-propelled. It also has a slender ship shaped hull to achieve a quick turnaround time with the vessel carrying several foundations or wind turbines each time. Azimuth thrusters are used to position the vessel during jack-up operations.

Besides self-propelled jack-up vessel, heavy lift vessel and other jack-up vessel which is used in wind turbine installation is also discussed as offshore wind turbine installation vessels. And in this report, we focus on the service market which is the most important part of the global offshore wind turbine installation vessel market.

Global Wind Turbine Installation Vessel key players include SEAFOX, DEME, Jack-Up Barge, etc. Global top three manufacturers hold a share over 20%.
