Abstracts

According to our (Global Info Research) latest study, the global Wind Turbine Operations & Maintenance market size was valued at USD 11920 million in 2023 and is forecast to a readjusted size of USD 26610 million by 2030 with a CAGR of 12.2% during review period.

Operation and maintenance (O&M) costs constitute a sizeable share of the total annual costs of a wind turbine. For a new turbine, O&M costs may easily make up 20-25 per cent of the total levelised cost per kWh produced over the lifetime of the turbine. If the turbine is fairly new, the share may only be 10-15 per cent, but this may increase to at least 20-35 per cent by the end of the turbine's lifetime. As a result, O&M costs are attracting greater attention, as manufacturers attempt to lower these costs significantly by developing new turbine designs that require fewer regular service visits and less turbine downtime.

The global top five wind turbine operations and maintenance manufacturers include Vestas, Siemens gamesa, GE renewable energy, Enercon, and Goldwind, which together account for about 50% of the market share. The largest manufacturer is Vestas, with a market share of about 20%. The Asia-Pacific region is the most important wind turbine operations and maintenance consumer market in the world, with a market share of more than 45%. In terms of type, wind turbine manufacturers have a market share of more than 45%. In the application field, the market share of onshore wind exceeds 90%.
