Abstracts

According to our (Global Info Research) latest study, the global Wind Turbine Pitch Control System market size was valued at US\$ 2472 million in 2024 and is forecast to a readjusted size of USD 4059 million by 2031 with a CAGR of 7.3% during review period.

Wind turbine pitch control system is one of the core control systems of wind turbine generators (WTGs). It is mainly used to adjust the blade angle (pitch angle) to optimize wind energy capture, ensure the safety of the unit, and adapt to different wind speed conditions.

Market Drivers

Growing Demand for Renewable Energy:

Global demand for clean energy continues to rise. Wind power generation is an important source, and wind turbine pitch control system is a core component. The market demand has grown accordingly. China's '14th Five-Year Plan' clearly defines the wind power installed capacity target. In 2030, the total installed capacity of wind power and solar power will exceed 1.2 billion kilowatts. Policies promote industry expansion.

Technological Progress and Innovation:

Intelligent technology (such as AI algorithm optimization control) improves the efficiency of the variable pitch system, and lightweight materials (such as carbon fiber composite materials) reduce weight and improve performance. Application of digital twin technology, such as Goldwind Technology optimizes power generation efficiency by

8%-12% through real-time simulation.

Policy Support and Subsidies:

Local governments have introduced offshore wind power subsidy policies. Guangdong, Zhejiang and other places have issued specific plans to support project construction. EU carbon tariff policy promotes technology iteration, and the penetration rate of intelligent wind power variable pitch control system will exceed 60% in 2025.

Cost reduction and cost-effectiveness improvement:

Large-scale production and standardized construction reduce the cost of variable pitch system and improve competitiveness. Chinese companies such as Goldwind Technology reduce supply chain dependence and ensure cost stability through vertical integration.
