According to our (Global Info Research) latest study, the global Wing-type eVTOL market size was valued at US\$ 965 million in 2024 and is forecast to a readjusted size of USD 17260 million by 2031 with a CAGR of 51.6% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

A wing-type eVTOL (Electric Vertical Take-Off and Landing) is an advanced aerial vehicle designed with fixed wings to enhance lift and efficiency during flight. Unlike traditional multirotor designs, this type of eVTOL combines the vertical takeoff and landing capabilities with the aerodynamic advantages of winged flight, allowing for longer ranges and higher speeds. Its design is optimized for urban air mobility, offering a sustainable and efficient solution for short to mid-range transportation, reducing traffic congestion and emissions in urban environments.
