According to our (Global Info Research) latest study, the global Wire & Cable market size was valued at USD 107040 million in 2023 and is forecast to a readjusted size of USD 152310 million by 2030 with a CAGR of 5.2% during review period.

Wire and Cable are used to connect two or more devices, enabling the transfer of electrical signals or power from one device to the other. Cables are used for a wide range of purposes, and each must be tailored for that purpose. Wire and Cable are used extensively in electronic devices for power and signal circuits. Long-distance communication takes place over undersea cables. Power cables are used for bulk transmission of alternating and direct current power, especially using high-voltage cable. Wire and Cable are extensively used in building wiring for lighting, power and control circuits permanently installed in buildings. Since all the circuit conductors required can be installed in a cable at one time, installation labor is saved compared to certain other wiring methods.

Global key wire & cable manufacturers include Prysmian, Nexans, Hengtong Group etc. The top 5 companies hold a share over 25%. Asia Pacific is the largest market, with a share about 48%, followed by Europe and North America with the share about 20% and 15%.
