The global Wire Feeding Machine (Wire Feeder Equipment) market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

An wire feeding machine is a machine that delivers welding wire to the welding part, so that the welding wire melts and fills the gap under the combined action of laser energy or other energy, and fuses with the base material to achieve welding. The use of laser welding machine with automatic wire feeding machine can greatly reduce the requirements for assembly accuracy during laser welding. The automatic wire feeding machine is also used to match CNC spring machines in the process of spring forming.
