The wire rope clamping lifting device is a device used in multi-rope friction hoisting systems that can simultaneously clamp and lift or lower all wire ropes in the hoisting channel. The device simplifies wire rope handling and reduces complex preparation steps. It is designed to withstand the maximum wire rope load and move the load within the lifting distance range through multiple cycles. It is usually parked in a suitable position behind the rope and can be moved to the working position according to the hydraulic control reversing to ensure safe and efficient lifting operations.
