A wire stripping tool is a device specifically designed to remove insulation from electrical wires. It is an essential tool for tasks like cutting wires and attaching terminals. The tool operates by slicing through the wire's insulation with either blades or rollers. There are two primary types: blade-type and roller-type, chosen based on the wire size.

Wire stripping tools are extensively used in electrical work, electronics projects, and various everyday scenarios that require insulation removal from wires. The tool functions by placing the wire within its grasp and utilizing the blades or rollers to strip off the insulation. Key characteristics of wire stripping tools include their ability to strip insulation safely and easily, suitability for a range of wire sizes, and cost-effectiveness.
