Abstracts

According to our (Global Info Research) latest study, the global Wireless Lithium-Ion Lawnmower market size was valued at US\$ 746 million in 2025 and is forecast to a readjusted size of US\$ 990 million by 2032 with a CAGR of 4.0% during review period.

In 2025, global production of cordless lithium-ion battery lawnmowers reached 2.6857 million units, with an average selling price of US\$270 per unit. The global annual production capacity of cordless lithium-ion battery lawnmowers is approximately 3.5 million units, with a gross profit margin of approximately 24.6%. Cordless lithium-ion battery lawnmowers are lawnmowers powered by lithium-ion batteries and driven by an electric motor. Compared to traditional fuel-powered lawnmowers, they have no fuel system, lower emissions, relatively lower noise, and are easier to maintain. They are often called cordless (cordless electric) lawnmowers or electric lawnmowers, but 'cordless' emphasizes that they do not rely on a wired power source. The upstream of the cordless lithium-ion battery lawnmower industry chain includes battery raw materials and components, motors and drive systems, and metal frames; the midstream consists of cordless lithium-ion battery lawnmower manufacturers; and the downstream mainly includes home gardening and municipal landscaping industries.
