A wireless split keyboard is a keyboard design that features a physical separation between its two halves, allowing users to position the left and right sections at shoulder-width apart. The wireless aspect eliminates the need for a direct cable connection to a computer, providing flexibility and reducing clutter in the workspace. This type of keyboard is often designed with an ergonomic focus, promoting a more natural hand and wrist alignment to reduce the risk of strain and discomfort during extended typing sessions. The split design accommodates individual preferences and ergonomic needs, allowing users to find a comfortable typing position. Wireless connectivity enables users to connect the keyboard to devices such as computers, tablets, or smartphones without the constraints of cords. The wireless split keyboard is particularly popular among individuals seeking a more ergonomic and customizable typing experience, contributing to improved comfort and efficiency in various work environments.
