Wireless Vehicle Detection Sensors are intelligent traffic sensing devices that detect the presence, movement, speed, occupancy, classification, and flow of vehicles using wireless communication technologies instead of traditional wired connections. They are widely used in Intelligent Transportation Systems (ITS), smart parking, traffic signal control, tolling systems, smart cities, highways, and access control applications.

These sensors collect vehicle-related data and transmit it wirelessly to traffic management centers, cloud platforms, gateways, or local controllers for real-time monitoring and traffic optimization.
