Abstracts

According to our (Global Info Research) latest study, the global Women's Deodorant market size was valued at US\$ 8111 million in 2025 and is forecast to a readjusted size of US\$ 10920 million by 2032 with a CAGR of 4.4% during review period.

Women's deodorant is a personal care product specifically formulated for women to reduce or neutralize body odor, especially in the underarm area. It often contains antibacterial agents to prevent odor-causing bacteria and may include antiperspirant ingredients to reduce perspiration. Women's deodorants typically feature light or floral/fruity scents and are designed with feminine packaging, catering to everyday use, work, and social situations. In 2025, global Women's Deodorant production reached approximately 1383 million units, with an average global market price of around 5.7 US\$/Unit. The production capacity of Women's Deodorant reaches 1700 million units, and the industry's gross profit margin is approximately between 30% and 50%.

The market demand for women's deodorants is primarily driven by multiple factors, including women's increasing emphasis on personal hygiene and body care, the growing expectation for a fresh feeling in daily social and professional environments, continuous innovation in fragrance experience and skincare functions, and consumers' growing concern for ingredient safety and natural formulas. With the development of women's health awareness and self-acceptance concepts, deodorants have evolved from simple odor control tools into daily care necessities that integrate exquisite fragrances, gentle skin care, and lifestyle aesthetics. At the same time, brands are further catering to modern women's comprehensive needs for efficiency, safety, and environmental protection through segmented scenarios and sustainable packaging design, driving the category to continue to grow towards high-end, personalized, and

multifunctional directions.
