## Abstracts

According to our (Global Info Research) latest study, the global Women's Sandals market size was valued at USD 18080 million in 2023 and is forecast to a readjusted size of USD 22910 million by 2030 with a CAGR of 3.4% during review period.

Sandals are an open type of footwear, consisting of a sole held to the wearer's foot by straps going over the instep and, sometimes, around the ankle.

High-heeled sandals are the common type of women sandal. They can be formal or casual- made according to the need of the occasion. Hiking or trekking women sandals are specially designed for trekking or hiking in tropical and hot climate with rubber sole. Sports women sandals are popular for outdoor activities. The open thong is a dressier version of a flip-flop which gives nicer look and shape to feet. Closed toe sandals give support to feet and hide the feet that need a pedicure. Mesh are the ankle strap sandals which are lightweight and look elegant on feet. Gladiator which consists of numerous strap provide great support and give a modern touch. Open-toe women sandals are good for those who have sweaty feet during summer.
