Abstracts

The global Wood Charcoal market size is expected to reach \$ million by 2032, rising at a market growth of %CAGR during the forecast period (2026-2032).

Charcoal is a wood fuel consumed in cities and towns. Some of the factors influencing the choice of using charcoal instead of firewood in urban areas include: Charcoal has a higher calorific value per unit weight than firewood, it is therefore more economical to transport charcoal over longer distances as compared to firewood; Storage of charcoal takes less room as compared to firewood; Charcoal is not liable to deterioration by insects and fungi which attack firewood; Charcoal is almost smokeless and sulphur-free, as such it is ideal fuel for BBQ in towns and cities.

United States Forklift key players include Kingsford, Royal Oak, Duraflame, Fire & Flavor, etc. Top two companies hold a share about 90%. In terms of product, Charcoal Briquets is the largest segment, with a share over 60%. And in terms of application, the largest channel is household.
