According to our (Global Info Research) latest study, the global Wood Construction Screw market size was valued at USD 14160 million in 2023 and is forecast to a readjusted size of USD 17040 million by 2030 with a CAGR of 2.7% during review period.

Wood construction screws are one of the most commonly used industrial fasteners. They are primarily used for wood-to-wood connection. These woodworking screws usually require pre-drilled holes. They are better suited for applications that involve plywood, lumber, and other wood materials. They can also be used to attach door hinges, locks, and other non-wood objects. All wood screws have destructive thread to hold the wood. There are several differences in varieties of wood screws. Wood screws are usually made of hardened steel. However, they are also available in brass and stainless steel. In addition, some wood screws have coating in order to prevent corrosion. They are commonly available with flat, oval and pan-shaped heads.

The market concentration of Wood Construction Screws is not high, the main players in the market are Wurth, SFS Group, SPAX, Grip-Rite, Fischer, Simpson Strong-Tie, HECO-Schrauben, BTI, Rothoblaas, TR Fastenings, Forch, Dresselhaus, Friulsider SPA, Eurotec, Shiga, GRK Fasteners, SENCO, Kreg, FastCap and Swordfish Tools, etc. Among them, Wurth has the largest share in the wood screws market, which account for about 4.55% of revenue share in 2019. Wood screws comes in many different types, and widely used in different areas. Based on the major materials of product, it can be classified as Carbon Steel, Stainless Steel and Brass, etc.

In the past few years, the price of wood screws was basically stable and we expect the

price may keep the trend in a short period. However, as the improvement of energy, transportation costs, employee wages, and equipment depreciation will play a significant role in promoting the cost of wood screws.
