According to our (Global Info Research) latest study, the global Wood Pallet market size was valued at USD 8538.7 million in 2023 and is forecast to a readjusted size of USD 11110 million by 2030 with a CAGR of 3.8% during review period.

A pallet, sometimes inaccurately called a skid (a skid has no bottom deck boards), is a flat transport structure that supports goods in a stable fashion while being lifted by a forklift, pallet jack, front loader, work saver, or other jacking device, or a crane. A pallet is the structural foundation of a unit load which allows handling and storage efficiencies. Goods or shipping containers are often placed on a pallet secured with strapping, stretch wrap or shrink wrap and shipped. Since its invention in the twentieth century, its use has dramatically supplanted older forms of crating like the wooden box and the wooden barrel, as it works well with modern packaging like cardboard boxes and Intermodal containers commonly used for bulk shipping. Most pallets are wooden pallets.

North America is the largest producer of Wood Pallet, with a market share about 44%, followed by Europe and Asia-Pacific. Brambles, Palletone, Pooling Partners, PGS and Millwood are the key manufacturers of industry, and Brambles had more than 45% market share.
