The global WPC Antenna market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The WPC antenna is an antenna used for wireless charging. It adopts the Qi standard developed by the Wireless Power Alliance and can achieve wireless charging of Qi-compatible devices. WPC antennas are usually composed of resonant inductors and resonant capacitors. Their working principle is to convert electrical energy into high-frequency electromagnetic fields at the transmitting end, and then convert the electromagnetic fields into electrical energy at the receiving end to achieve wireless charging. WPC antennas are widely used in smartphones, tablets, smart watches, smart homes and other devices, providing users with a convenient wireless charging experience.
